

NGUYEN PHI VU

Java Backend Developer

CAREER OBJECTIVE

Final-year Software Engineering student with hands-on experience in building microservices architecture using Java and Spring Boot. Seeking a Java Backend internship to apply knowledge of microservices, Spring ecosystem, cloud deployment, and system design in a professional environment. Eager to contribute to scalable backend systems while learning from experienced teams.

EDUCATION

Industrial University of Ho Chi Minh City
Bachelor of Software Engineering

September 2021 - Present

SKILLS

Java & Backend Development

- Programming Languages: Java, Javascript.
- Framework: Spring Boot, Spring Cloud, Spring Security.
- Architecture: Microservices Architecture, RESTful API, API Gateway.
- Service Discovery: Eureka Server.
- Database: MariaDB/MySQL, Redis(Caching & Session Management).
- Payment Integration: Stripe.
- Other: Docker, REST API Development, Error Handling & Retry Mechanism.

DevOps & Infrastructure

- Containerization: Docker, Docker Compose
- Deployment: Render, Railway, Vercel
- CI/CD: Github Actions
- Infrastructure as Code: Terraform
- Version Control: Git, GitHub

Development Tools

- IDE: VS Code, IntelliJ/Android Studio
- API Testing: Postman
- Other: Spring Data JPA, Lombok, Maven/Gradle

PERSONAL PROJECTS

T.E.M.G E-Commerce Platform(Technology Equipment Manufacturing Group)

Source: https://github.com/Dlhuutien/KienTrucvaThietKe_phanMem

Live Demo: <https://kien-trucva-thiet-ke-phan-mem.vercel.app/>

- Designed and developed a scalable microservices e-commerce system using Java Spring Boot and Spring Cloud.
- Implemented 7 core backend services: auth_service, user_service, product_service, order_service, payment_service, inventory_service, and provider_service.

- Configured Eureka Server for service discovery and API Gateway as the single entry point.
- Integrated Redis for caching & session management, MariaDB (Railway) as the main database, and Stripe for payment processing.
- Utilized Docker, Docker Compose, and GitHub Actions (CI/CD) for containerization and automated deployment on Render & Railway.
